Week 1-2 Work

🧠 **Here's a Clear Role-wise Plan (Week 1–2 Focus)**

👨‍💻 **Aditya (Developer)**

- Set up Git repo & folder structure (done ✅)
- Begin implementing:
  - ☐ Home Screen
  - ☐ Lifestyle Input Screen (basic layout)
- Push initial code + `README.md`
- Add placeholders for research content (to be integrated later)

📚 **Anushree (Researcher)**

Start writing summaries for the first 2 research topics:

☐ Incidence Rates of Diabetes (Global & India)

☐ Types of Diabetes (Type 1, 2, Gestational)

Use language simple enough for the app's "Learn More" section. I can generate summaries or help polish your notes if needed.

🎨 **Tanvi (Designer)**

- Create low-fidelity wireframes for:
  - ☐ Home Screen
  - ☐ Lifestyle Tracking Screen
  - ☐ Education Section
- Use **Canva**, **Figma**, or **Whimsical**
- Share screenshots or links with the team
